**instant
auto-focusing
that "stays
out of the
picture"**

**the amazing KODAK CAROUSEL
850 Projector**

NEW PRECISION IN SLIDE SHOWS

It's yours in the new KODAK CAROUSEL 850 Projector—with automatic focusing so fast you need a quick eye to catch any focus motion on the screen.

There's no overshooting. No wobbly in-and-out-of-focus motion. No eyestrain.

You simply focus the first slide. Then sit back and enjoy sharply focused pictures, slide after slide. The projector does it automatically.

This is perfected auto-focusing—so fast and precise it doesn't intrude into your slide shows. It "stays out of the picture."

JAMPROOF AND COMPLETE

In addition to instant automatic focusing, the new CAROUSEL 850 brings you all the other famous CAROUSEL Projector benefits—the pleasure of jamproof projection, the reliable gravity feed, the instant-change, long-play round trays, instant editing, **remote** forward-and-reverse slide change, and automatic slide-change at 5-, 8-, or 15-second intervals.

There's the complete system of "super-showmanship" aids, too, such as the Sound Synchronizer, Programmer, and Dissolve Control; and a choice of six fine projection lenses, including zoom.

The new KODAK CAROUSEL 850 Projector is the finest slide projector you have ever examined. Once you've experienced its instant auto-focusing and jamproof projection, you'll know this is the one for you. See it soon.
